

Build your own iGarden Geodesic Greenhouse

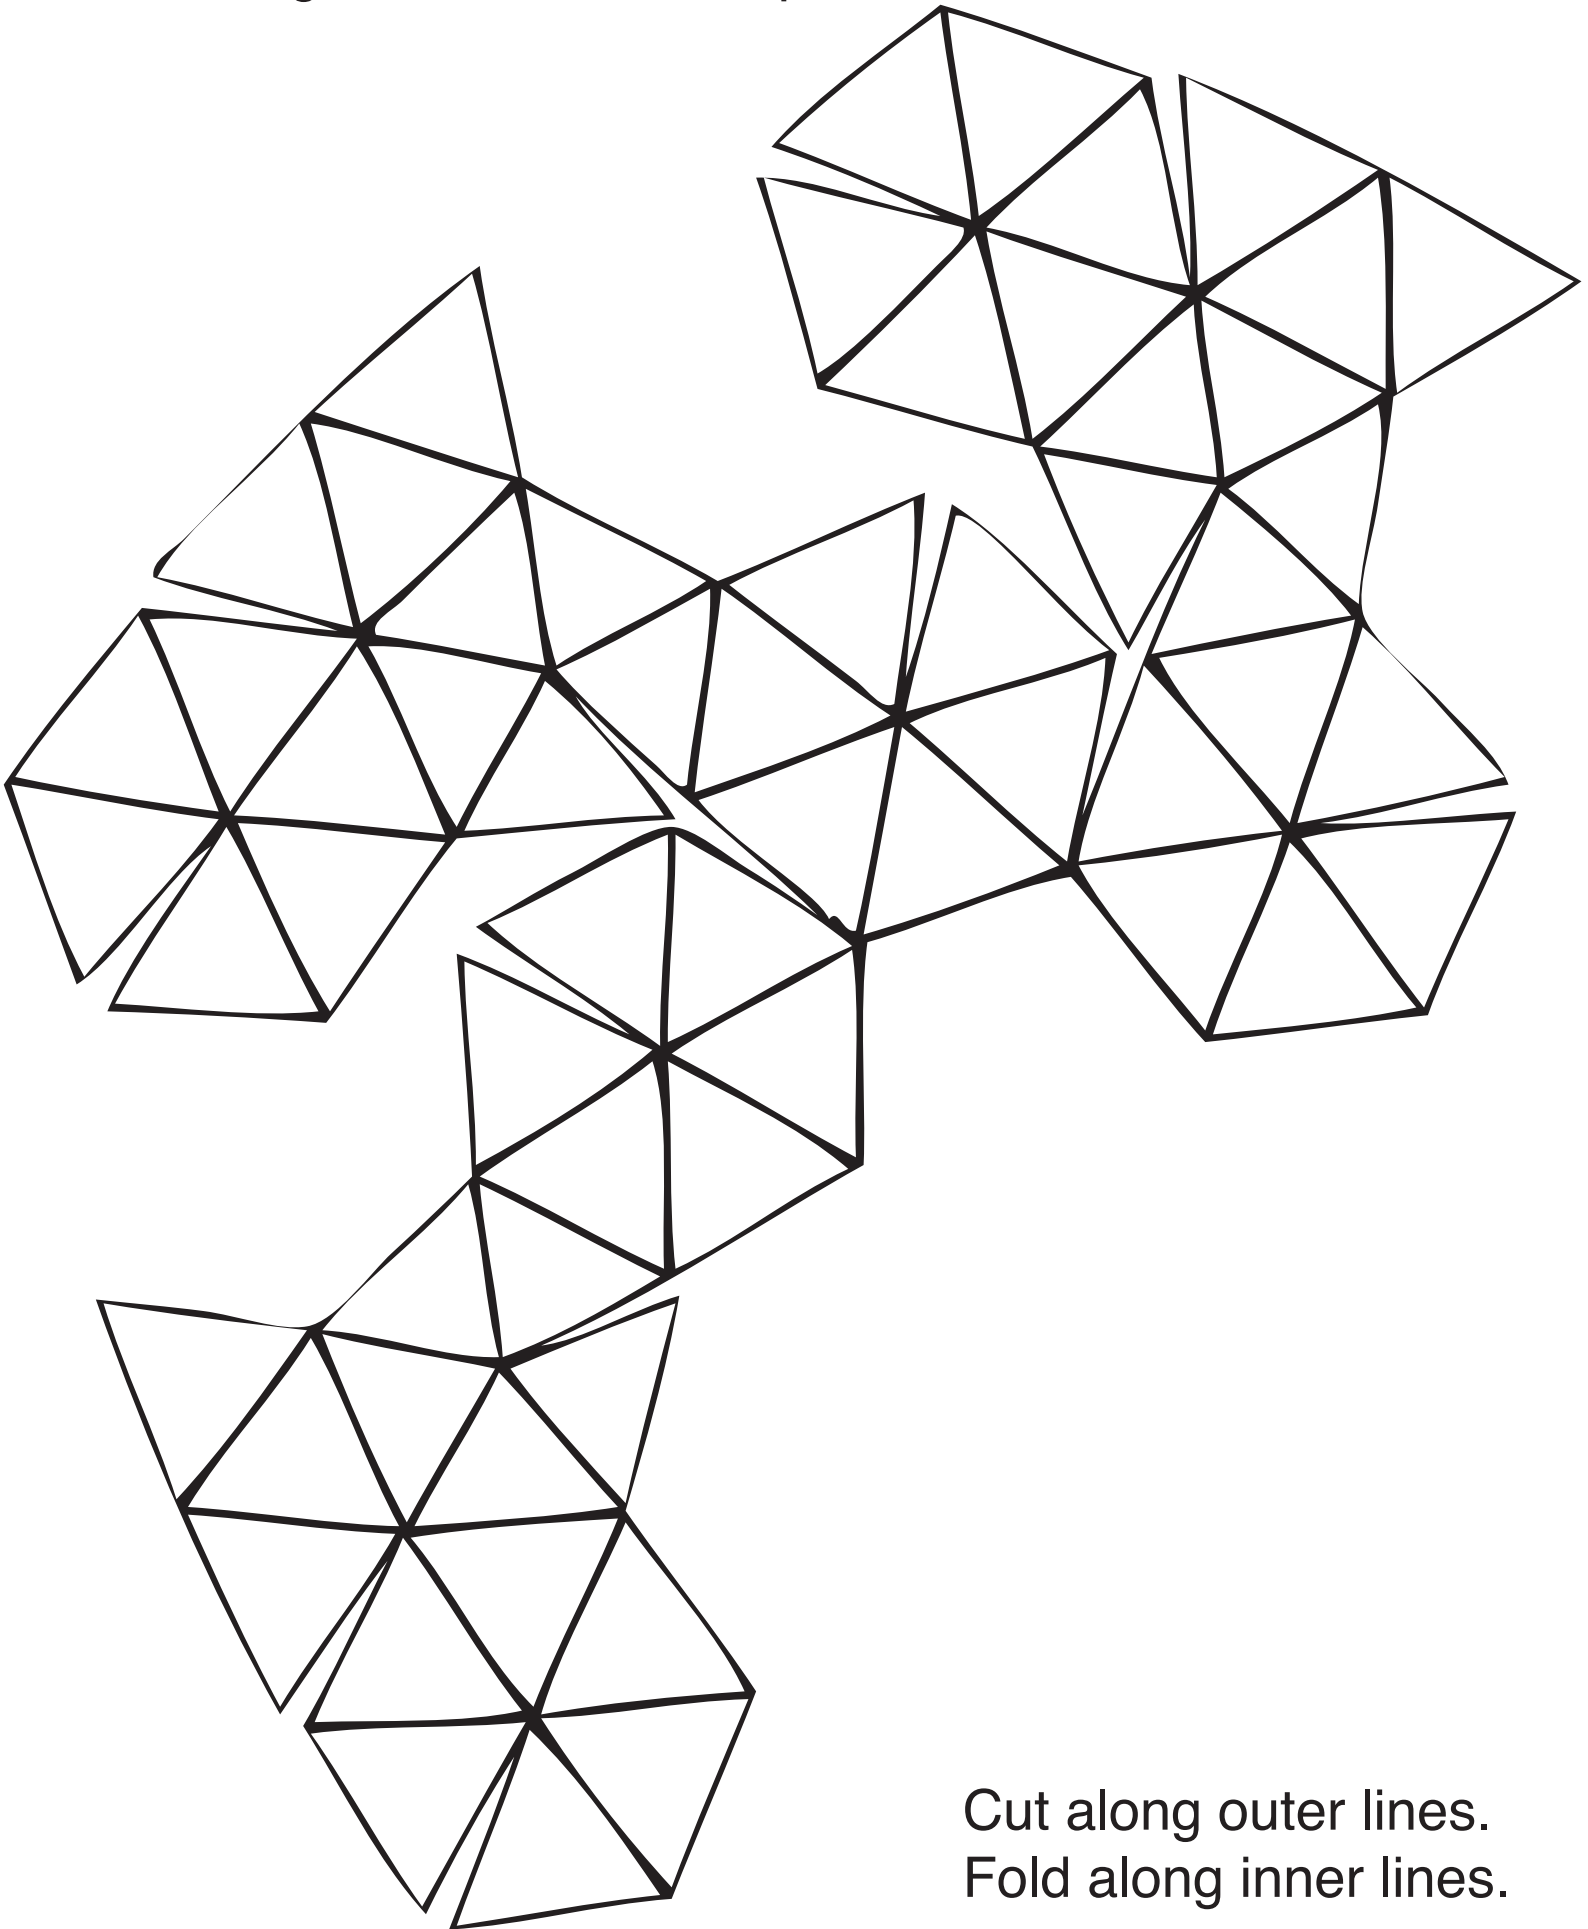

1. **TRACE** the left and right halves of the paper templates onto plastic film.
2. **CUT OUT** the template traces from the plastic film using either a razor or sharp scissors.
3. **BEND** along the inner fold lines (the lines forming the inner triangles of the hexagons and pentagons).
4. **FOLD** along all fold lines.
5. **JOIN** the pentagons and hexagons with clear tape along the inside of the dome. Join both completed halves of the dome.

Instructions and geodesic dome template modified from:
