

7.21.10

meeting minutes

We'll be able to use the plate reader by the end of the week, we'll be able to do assays and have pictures for lab meeting by the end of the week.

Amanda/tom—have *golT* *golB* and *golS*. Need to start getting terminators and RBS on plasmids

Everyone should try to make a schedule of what needs to be done to complete the project.

For Friday's lab meeting—overall schematic with our design, in combination with the decoder.

New competent cells from NEB work really well. Buy some more.
