

Hackspace Schedule

Preparation:

Primer design Workshop-24th August

iGEMers: Yeping, Aurelija

Introduce biobrick prefix/suffix

Gather resources for Workshops-29th-31st August:

For DIY shaker/incubator, incubator program

Wednesday 29th August	
iGEMers: Aurelija, Carina, Martina	Day 1 competent cell protocol Making minimal agar plates and spreading plates Build DIY incubator/shaker for day 2 incubation
Thursday 30th August	
iGEMers: Yeping Martiana	Day 2 competent cell protocol Pick colony into LB + 1M MgSO ₄ solution PCR of PSB1C3 (CMP plasmid backbone) with Hackspace PCR machine iGEMers learn to program the machine
Friday 31st August	
iGEMers: Yeping Martiana	Gel electrophoresis of PCR product from Thursday (PSB1C3) using Hackspace gel box Day 3 competent cell protocol
