

9. Is the organism/part listed under the Australia Group guidelines, or otherwise restricted for transport? If so, how will your team ship this part to iGEM and the Jamborees?

This part is restricted for transport,so we replace it with GFP in the vector shipping to regisrtry.

10. Please describe the BioSafety Level of the lab in which the team works, or description of safety features of lab (Refer to Basic Safety form, question 8. d.). If you are using organisms with a BSL level greater than you lab, please explain any additional safety precautions you are taking.

Level 1.

Our project covers no manipulation on the organism,so no additional safety precautions is required.
