

EasyBbk Documentation:

data_center API

Author: Chen YiBai

Version: 1.0.0

Date: 2014 / 10 / 15

Introduction

This is a documentation auto generated by doxygen V1.8.8 about the package “data_center” in the software “Easy BBK”. The documentation introduces all the source files in the package “data_center” and extract the annotations in the source code into it, which may provide some help for the usage and further development of “data_center”.

"Easy BBK" is a trial to provide a standardized, visualized and user friendly access to bio-brick system by simplify and interassociate the searching, comparing, designing and uploading of bio-bricks. These four main functions constitute the "Easy BBK" client-side which is realized by pure java and supported by a remote server through the internet.

“data_center” is the connector between the GUI and the remote server, it connect to the online database and program in server, as well as downloading, storing and providing the data to the GUI part of “Easy BBK”. Having access to the source code or .jar file of the “data_center”, one can use most of the main functions of “Easy BBK” about searching, comparing and uploading through the API provided.

Namespace Index

Packages

Here are the packages with brief descriptions (if available):

<u>data center</u>	8
--	---

Hierarchical Index

Class Hierarchy

This inheritance list is sorted roughly, but not completely, alphabetically:

data_center.BbkType.Sketch.BackBone	9
data_center.BbkOutline	25
data_center.BbkDetail	17
data_center.BbkProperties	32
data_center.BbkType	33
data_center.BbkUpload	40

Constructor & Destructor Documentation

data_center.SketchComponent.BackBone.BackBone (int *theID*, Rectangle *bounds*)

Definition at line 312 of file SketchComponent.java.

data_center.SketchComponent.BackBone.BackBone (int *theID*, Rectangle *bounds*, ArrayList< Integer > *childIDList*)

Definition at line 319 of file SketchComponent.java.

Member Function Documentation

void data_center.SketchComponent.BackBone.display ()

Definition at line 346 of file SketchComponent.java.

Rectangle data_center.SketchComponent.BackBone.getBounds ()

Definition at line 331 of file SketchComponent.java.

ArrayList<Integer> data_center.SketchComponent.BackBone.getChildren ()

Definition at line 339 of file SketchComponent.java.

Color data_center.SketchComponent.Component.getColor () [inherited]

Definition at line 79 of file SketchComponent.java.

ArrayList<Point> data_center.SketchComponent.Component.getCurve () [inherited]

Definition at line 90 of file SketchComponent.java.

Font data_center.SketchComponent.Component.getFont () [inherited]

Definition at line 74 of file SketchComponent.java.

Integer data_center.SketchComponent.Component.getSecondaryType () [inherited]

Definition at line 52 of file SketchComponent.java.

String data_center.SketchComponent.Component.getString () [inherited]

text for [Label](#), and bbkName for [BioBrick](#)

Definition at line 59 of file SketchComponent.java.

Double data_center.SketchComponent.Component.getThickness () [inherited]

the thickness in the [Relation](#)

Definition at line 85 of file SketchComponent.java.

void data_center.SketchComponent.BackBone.setBounds (Rectangle bounds)

Definition at line 335 of file SketchComponent.java.

void data_center.SketchComponent.BackBone.setChildren (ArrayList< Integer > *children*)

Definition at line 343 of file SketchComponent.java.

void data_center.SketchComponent.Component.setColor (Color *color*) [inherited]

Definition at line 82 of file SketchComponent.java.

void data_center.SketchComponent.Component.setCurve (ArrayList< Point > *curve*) [inherited]

Definition at line 93 of file SketchComponent.java.

void data_center.SketchComponent.Component.setFont (Font *font*) [inherited]

Definition at line 77 of file SketchComponent.java.

void data_center.SketchComponent.Component.setSecondaryType (Integer *type*) [inherited]

Secondary type is defined in [BbkType.Sketch](#)

Definition at line 56 of file SketchComponent.java.

void data_center.SketchComponent.Component.setString (String *str*) [inherited]

text for [Label](#), and bbkName for [BioBrick](#)

Definition at line 63 of file SketchComponent.java.

void data_center.SketchComponent.Component.setThickness (double *thickness*) [inherited]

Definition at line 88 of file SketchComponent.java.

[BackBone](#) data_center.SketchComponent.Component.toBackBone () [inherited]

Definition at line 39 of file SketchComponent.java.

[BioBrick](#) data_center.SketchComponent.Component.toBioBrick () [inherited]

Definition at line 33 of file SketchComponent.java.

[BioVector](#) data_center.SketchComponent.Component.toBioVector () [inherited]

Definition at line 45 of file SketchComponent.java.

[Label](#) data_center.SketchComponent.Component.toLabel () [inherited]

Definition at line 30 of file SketchComponent.java.

[Protein](#) data_center.SketchComponent.Component.toProtein () [inherited]

Definition at line 36 of file SketchComponent.java.

[Relation](#) `data_center.SketchComponent.Component.toRelation () [inherited]`

Definition at line 42 of file SketchComponent.java.

[BackBone](#) `data_center.SketchComponent.BackBone.toSubclass ()`

Definition at line 327 of file SketchComponent.java.

Member Data Documentation

`ArrayList<Integer> data_center.SketchComponent.BackBone.bbkChildren`

Definition at line 310 of file SketchComponent.java.

`Rectangle data_center.SketchComponent.BackBone.bounds`

Definition at line 309 of file SketchComponent.java.

`int data_center.SketchComponent.Component.ID [inherited]`

Definition at line 16 of file SketchComponent.java.

`String data_center.SketchComponent.Component.primaryType [inherited]`

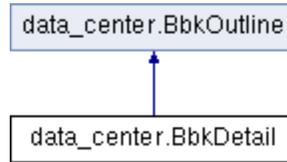

Definition at line 17 of file SketchComponent.java.

```

Detailed Description

The class to store the constants of the types of biobrick.

Definition at line 4 of file BbkType.java.

ArrayList< [Category](#) > [categories](#) = new ArrayList<[Category](#)>()
ArrayList< [Feature](#) > [features](#) = new ArrayList<[Feature](#)>()
ArrayList< [Parameter](#) > [parameters](#) = new ArrayList<[Parameter](#)>()

Detailed Description

The data stored locally in the EasyBbk before upload. A filled [BbkUpload](#) can be used to upload a biobrick directly into the database established by SJTU-software.

Definition at line 9 of file BbkUpload.java.

Constructor & Destructor Documentation

data_center.BbkUpload.BbkUpload ()

Definition at line 37 of file BbkUpload.java.

Member Function Documentation

void data_center.BbkUpload.display ()

Definition at line 252 of file BbkUpload.java.

void data_center.BbkUpload.fillPrivateData (ResultSet *resultSet*) throws SQLException

Used when filling private from database into bbkUpload, others in DBDataFiller

Exceptions:

<i>SQLException</i>	
---------------------	--

Definition at line 126 of file BbkUpload.java.

String data_center.BbkUpload.getEnterDate ()

Definition at line 51 of file BbkUpload.java.

String data_center.BbkUpload.getID ()

Definition at line 60 of file BbkUpload.java.

String data_center.BbkUpload.getName ()

Definition at line 39 of file BbkUpload.java.

String data_center.BbkUpload.getSequence ()

Definition at line 76 of file BbkUpload.java.

String data_center.BbkUpload.getShortName ()

setShortName in [setName\(\)](#)

Definition at line 73 of file BbkUpload.java.

void data_center.BbkUpload.setEnterDate ()

Definition at line 54 of file BbkUpload.java.

void data_center.BbkUpload.setID (String *ID*)

Definition at line 63 of file BbkUpload.java.

void data_center.BbkUpload.setID ()

Definition at line 66 of file BbkUpload.java.

void data_center.BbkUpload.setName (String name)

rawName is some thing without "BBa_", like "B0012". Suffix "_EasyBbk" will be automatically appended to distinguish them from the biobricks fetched from igem.org

Definition at line 45 of file BbkUpload.java.

void data_center.BbkUpload.setSequence (boolean useDefaultScar, boolean findTwins)

Also set the subscar, subpart, deepsubpart and twins at the same time Please call uploadCenter.isSequanceValid() first. useDefaultScar means use RFC[10] to fill all unspecified scars between bio-bricks

Definition at line 83 of file BbkUpload.java.

data_center.BbkProperties.Category Class Reference

Inheritance diagram for data_center.BbkProperties.Category:

Public Member Functions

[Category \(\)](#)

[Category \(ResultSet resultSet\)](#) throws SQLException

Public Attributes

String [category](#)

Detailed Description

Definition at line 10 of file BbkProperties.java.

Constructor & Destructor Documentation

`data_center.BbkProperties.Category.Category ()`

Definition at line 14 of file BbkProperties.java.

`data_center.BbkProperties.Category.Category (ResultSet resultSet) throws SQLException`

Definition at line 16 of file BbkProperties.java.

Member Data Documentation

`String data_center.BbkProperties.Category.category`

Definition at line 12 of file BbkProperties.java.

The documentation for this class was generated from the following file:

D:/_About å-ä¹/ç^±å • %å§†/SJTU-Software_2014/src/data_center/BbkProperties.java

data_center.BbkUpload.Category Class Reference

Inheritance diagram for data_center.BbkUpload.Category:

Public Member Functions

[Category](#) (String [category](#))

[Category](#) (ResultSet resultSet) throws SQLException

Public Attributes

String [category](#)

Detailed Description

Definition at line 138 of file BbkUpload.java.

Constructor & Destructor Documentation

data_center.BbkUpload.Category.Category (String category)

Definition at line 140 of file BbkUpload.java.

data_center.BbkUpload.Category.Category (ResultSet resultSet) throws SQLException

Used to fill data from database when modify uploaded bbk

Definition at line 146 of file BbkUpload.java.

Member Data Documentation

String data_center.BbkProperties.Category.category [inherited]

Definition at line 12 of file BbkProperties.java.

The documentation for this class was generated from the following file:

D:/_About å-ä¹/ç^±å • %å§†/SJTU-Software_2014/src/data_center/BbkUpload.java

data_center.OfficialUploadPoster.CatogoryComparator Class Reference

Inheritance diagram for data_center.OfficialUploadPoster.CatogoryComparator:

Public Member Functions

[CatogoryComparator](#) ()

[CatogoryComparator](#) (int order)

int [compare](#) ([Category](#) o1, [Category](#) o2)

Static Public Attributes

static final int [ASC](#) = 1

static final int [DESC](#) = -1

Detailed Description

The comparator to sort the categories. When posting, the newly posted item's id is set to 999, the previously posted need to be posted in sorted order along with the newest one.

Definition at line 315 of file OfficialUploadPoster.java.

Constructor & Destructor Documentation

data_center.OfficialUploadPoster.CatogoryComparator.CatogoryComparator ()

Definition at line 323 of file OfficialUploadPoster.java.

data_center.OfficialUploadPoster.CatogoryComparator.CatogoryComparator (int order)

Definition at line 327 of file OfficialUploadPoster.java.

Member Function Documentation

`int data_center.OfficialUploadPoster.CatogoryComparator.compare (Category o1, Category o2)`

Definition at line 336 of file OfficialUploadPoster.java.

Member Data Documentation

`final int data_center.OfficialUploadPoster.CatogoryComparator.ASC = 1 [static]`

Definition at line 317 of file OfficialUploadPoster.java.

`final int data_center.OfficialUploadPoster.CatogoryComparator.DESC = -1 [static]`

Definition at line 318 of file OfficialUploadPoster.java.

The documentation for this class was generated from the following file:

D:/_About å- ä¹/ç^±å • %å§†/SJTU-Software_2014/src/data_center/OfficialUploadPoster.java

data_center.CompareCenter Class Reference

Public Member Functions

[CompareCenter](#) ()

[BbkDetail](#) [assignDetail](#) (String bbkName, int pos)

[BbkDetail](#) [getDetail](#) (int pos)

Public Attributes

[BbkDetail](#)[] [compareList](#) = {null, null, null}

Detailed Description

Provide a comparison between up to 3 bbkDetails, pos == 0, 1, 2

Definition at line 4 of file CompareCenter.java.

Constructor & Destructor Documentation

data_center.CompareCenter.CompareCenter ()

Definition at line 8 of file CompareCenter.java.

Member Function Documentation

[BbkDetail](#) data_center.CompareCenter.assignDetail (String *bbkName*, int *pos*)

Specify a bbkName to inquire in the database, set it in the list and return.

Returns:

The [BbkDetail](#) instance just assigned, null if the bbkName is not in database or the pos is not 0, 1 or 2.

Definition at line 13 of file CompareCenter.java.

[BbkDetail](#) data_center.CompareCenter.getDetail (int *pos*)

Check the detail stored in the 3 slots in the compareCenter.

Definition at line 26 of file CompareCenter.java.

Member Data Documentation

[BbkDetail](#) [] data_center.CompareCenter.compareList = {null, null, null}

Definition at line 6 of file CompareCenter.java.

The documentation for this class was generated from the following file:

D:/_About å-ä¹¸¹/ç^±å • %å§†/SJTU-Software_2014/src/data_center/CompareCenter.java

data_center.SketchComponent.Component Class Reference

Inheritance diagram for data_center.SketchComponent.Component:

Public Member Functions

[Component](#) (int theID, String theType)
abstract [Component toSubclass](#) ()
[Label toLabel](#) ()
[BioBrick toBioBrick](#) ()
[Protein toProtein](#) ()
[BackBone toBackBone](#) ()
[Relation toRelation](#) ()
[BioVector toBioVector](#) ()
Integer [getSecondaryType](#) ()
void [setSecondaryType](#) (Integer type)
String [getString](#) ()
void [setString](#) (String str)
Rectangle [getBounds](#) ()
void [setBounds](#) (Rectangle rect)
Font [getFont](#) ()
void [setFont](#) (Font font)
Color [getColor](#) ()
void [setColor](#) (Color color)
Double [getThickness](#) ()
void [setThickness](#) (double thickness)
ArrayList< Point > [getCurve](#) ()
void [setCurve](#) (ArrayList< Point > curve)
ArrayList< Integer > [getChildren](#) ()
void [setChildren](#) (ArrayList< Integer > children)
void [display](#) ()

Public Attributes

int [ID](#)
String [primaryType](#)

Detailed Description

The class to be extended by the 6 subclasses. Providing all the required set/get functions. Including toXXXXX() to make class cast easier~

Definition at line 14 of file SketchComponent.java.

Constructor & Destructor Documentation

data_center.SketchComponent.Component.Component (int *theID*, String *theType*)

Definition at line 19 of file SketchComponent.java.

Member Function Documentation

void data_center.SketchComponent.Component.display ()

Definition at line 101 of file SketchComponent.java.

Rectangle data_center.SketchComponent.Component.getBounds ()

The bounds specify both the position and the size of the component. The position is the location of the left upper corner.

Definition at line 67 of file SketchComponent.java.

ArrayList<Integer> data_center.SketchComponent.Component.getChildren ()

bbkChildren in backBone, the IDs

Definition at line 96 of file SketchComponent.java.

Color data_center.SketchComponent.Component.getColor ()

Definition at line 79 of file SketchComponent.java.

ArrayList<Point> data_center.SketchComponent.Component.getCurve ()

Definition at line 90 of file SketchComponent.java.

Font data_center.SketchComponent.Component.getFont ()

Definition at line 74 of file SketchComponent.java.

Integer data_center.SketchComponent.Component.getSecondaryType ()

Definition at line 52 of file SketchComponent.java.

String data_center.SketchComponent.Component.getString ()

text for [Label](#), and bbkName for [BioBrick](#)

Definition at line 59 of file SketchComponent.java.

Double data_center.SketchComponent.Component.getThickness ()

the thickness in the [Relation](#)

Definition at line 85 of file SketchComponent.java.

void data_center.SketchComponent.Component.setBounds (Rectangle rect)

The bounds specify both the position and the size of the component. The position is the location of the left upper corner.

Definition at line 72 of file SketchComponent.java.

void data_center.SketchComponent.Component.setChildren (ArrayList< Integer > children)

Definition at line 99 of file SketchComponent.java.

void data_center.SketchComponent.Component.setColor (Color *color*)

Definition at line 82 of file SketchComponent.java.

void data_center.SketchComponent.Component.setCurve (ArrayList< Point > *curve*)

Definition at line 93 of file SketchComponent.java.

void data_center.SketchComponent.Component.setFont (Font *font*)

Definition at line 77 of file SketchComponent.java.

void data_center.SketchComponent.Component.setSecondaryType (Integer *type*)

Secondary type is defined in [BbkType.Sketch](#)

Definition at line 56 of file SketchComponent.java.

void data_center.SketchComponent.Component.setString (String *str*)

text for [Label](#), and bbkName for [BioBrick](#)

Definition at line 63 of file SketchComponent.java.

void data_center.SketchComponent.Component.setThickness (double *thickness*)

Definition at line 88 of file SketchComponent.java.

[BackBone](#) data_center.SketchComponent.Component.toBackBone ()

Definition at line 39 of file SketchComponent.java.

[BioBrick](#) data_center.SketchComponent.Component.toBioBrick ()

Definition at line 33 of file SketchComponent.java.

[BioVector](#) data_center.SketchComponent.Component.toBioVictor ()

Definition at line 45 of file SketchComponent.java.

[Label](#) data_center.SketchComponent.Component.toLabel ()

Definition at line 30 of file SketchComponent.java.

[Protein](#) data_center.SketchComponent.Component.toProtein ()

Definition at line 36 of file SketchComponent.java.

[Relation](#) data_center.SketchComponent.Component.toRelation ()

Definition at line 42 of file SketchComponent.java.

abstract [Component](#) data_center.SketchComponent.Component.toSubclass () [abstract]

This function is used to be inherited to convert [Component](#) object into its subclasses using convariant, but seems failed...

Member Data Documentation

int data_center.SketchComponent.Component.ID

Definition at line 16 of file SketchComponent.java.

String data_center.SketchComponent.Component.primaryType

Definition at line 17 of file SketchComponent.java.

The documentation for this class was generated from the following file:

D:/_About å-ä¹/ç^±å • %å§†/SJTU-Software_2014/src/data_center/SketchComponent.java

data_center.DatabaseConnector Class Reference

Detailed Description

The class to connect the EasyBbk and the database by SJTU-software.

Definition at line 9 of file DatabaseConnector.java.

The documentation for this class was generated from the following file:

D:/_About å-ä¹/ç^±å • %å§†/SJTU-Software_2014/src/data_center/DatabaseConnector.java

data_center.DataCenter Class Reference

Public Member Functions

[DataCenter](#) ()

Public Attributes

[SearchCenter](#) [searchCenter](#)

[SketchCenter](#) [sketchCenter](#)

[CompareCenter](#) [compareCenter](#)

[UploadCenter](#) [uploadCenter](#)

Detailed Description

The overall function of the package [data_center](#). Keep the Datacenter instance to get access to the searchCenter, sketchCenter, compareCenter, uploadCenter, which provide all of the main function in EasyBbk.

Definition at line 6 of file DataCenter.java.

Constructor & Destructor Documentation

data_center.DataCenter.DataCenter ()

Definition at line 13 of file DataCenter.java.

Member Data Documentation

[CompareCenter](#) data_center.DataCenter.compareCenter

Definition at line 10 of file DataCenter.java.

[SearchCenter](#) data_center.DataCenter.searchCenter

Definition at line 8 of file DataCenter.java.

[SketchCenter](#) data_center.DataCenter.sketchCenter

Definition at line 9 of file DataCenter.java.

[UploadCenter](#) data_center.DataCenter.uploadCenter

Definition at line 11 of file DataCenter.java.

The documentation for this class was generated from the following file:

D:/_About å-ä¹/ç^±å • %å§†/SJTU-Software_2014/src/data_center/DataCenter.java

data_center.DBConsts Class Reference

Classes

class [Header](#)

class [Rating](#)

class [Table](#)

Detailed Description

Store all the constant in the Database, including headers and default score weights

Definition at line 5 of file DBConsts.java.

The documentation for this class was generated from the following file:

D:/_About ǎ-ǎ¹ç^±ǎ • %ǎǎ§†/SJTU-Software_2014/src/data_center/DBConsts.java

data_center.DBConsts.Header.DeepSub Class Reference

Static Public Attributes

```
static final String ID = "subpart_id"  
static final String NAME = "subpart_name"  
static final String SHORT\_DESC = "subpart_short_desc"  
static final String TYPE = "subpart_type"  
static final String NICKNAME = "subpart_nickname"
```

Detailed Description

DeepSubpart.ID != ID

Definition at line 101 of file DBConsts.java.

Member Data Documentation

final String data_center.DBConsts.Header.DeepSub.ID = "subpart_id" [static]

Definition at line 103 of file DBConsts.java.

data_center.OfficialUploadPoster Class Reference

Classes

class [CatogoryComparator](#)

class [ParamComparator](#)

Static Public Member Functions

static boolean [login](#) (String username, String password) throws Exception

static String [getNextAvailablePartName](#) () throws Exception

static String[] [getAvailablePartNameRegion](#) () throws Exception

static String [createNewPart](#) (String part_name, [BbkUpload](#) bbkUpload) throws Exception

static void [modifyPrimaryInfo](#) ([BbkUpload](#) bbkUpload) throws Exception

static void [modifySequence](#) ([BbkUpload](#) bbkUpload) throws Exception

static void [modifyCategories](#) ([BbkUpload](#) bbkUpload) throws Exception

static void [modifyParameters](#) ([BbkUpload](#) bbkUpload) throws Exception

static void [modifyFeatures](#) ([BbkUpload](#) bbkUpload) throws Exception

Detailed Description

This class sends post requests to the official registry and upload a biobrick for the user.

Definition at line 27 of file OfficialUploadPoster.java.

Member Function Documentation

static String data_center.OfficialUploadPoster.createNewPart (String *part_name*, [BbkUpload](#) *bbkUpload*) throws Exception [static]

Post and create a new part in the registry by the name specified.

Parameters:

<i>part_name</i>	The part_name, can be any String between the min and the max.
<i>bbkUpload</i>	The Strings wrapped in the BbkUpload instance to be uploaded.

Returns:

The part_id generated by the registry.

Definition at line 122 of file OfficialUploadPoster.java.

static String [] data_center.OfficialUploadPoster.getAvailablePartNameRegion () throws Exception [static]

Get the part name region available for the user.

Returns:

A String[] which length is 2, specifying the min and the max of the part name available.

Definition at line 97 of file OfficialUploadPoster.java.

static String data_center.OfficialUploadPoster.getNextAvailablePartName () throws Exception [static]

After logging in get the next available part name.

Returns:

The next available part name.

Definition at line 66 of file OfficialUploadPoster.java.

static boolean data_center.OfficialUploadPoster.login (String username, String password) throws Exception [static]

Login to the igem.org, uses the username and the password of the user.

Returns:

If or not succeeded in logging in.

Definition at line 34 of file OfficialUploadPoster.java.

static void data_center.OfficialUploadPoster.modifyCategories ([BbkUpload](#) bbkUpload) throws Exception [static]

Modify the category info by the String in the [BbkUpload](#) instance.

Definition at line 200 of file OfficialUploadPoster.java.

static void data_center.OfficialUploadPoster.modifyFeatures ([BbkUpload](#) bbkUpload) throws Exception [static]

Modify the feature info by the String in the [BbkUpload](#) instance.

Definition at line 252 of file OfficialUploadPoster.java.

**static void data_center.OfficialUploadPoster.modifyParameters ([BbkUpload](#) *bbkUpload*)
throws Exception [static]**

Modify the parameter info by the String in the [BbkUpload](#) instance.

Definition at line 224 of file OfficialUploadPoster.java.

**static void data_center.OfficialUploadPoster.modifyPrimaryInfo ([BbkUpload](#) *bbkUpload*)
throws Exception [static]**

Modify the primary info by the String in the [BbkUpload](#) instance.

Definition at line 156 of file OfficialUploadPoster.java.

**static void data_center.OfficialUploadPoster.modifySequence ([BbkUpload](#) *bbkUpload*)
throws Exception [static]**

Modify the sequence info by the String in the [BbkUpload](#) instance.

Definition at line 179 of file OfficialUploadPoster.java.

data_center.OperationHistory Class Reference

Public Member Functions

void [newOperation](#) ([SketchOperation](#) operation)
boolean [canCtrlZ](#) ()
boolean [canCtrlY](#) ()
[SketchOperation](#) [ctrlZ](#) ()
[SketchOperation](#) [ctrlY](#) ()
void [clear](#) ()
void [display](#) ()

Detailed Description

The class implements a history list contains roll back and go forward function. Different from the [SearchHistory](#), the [OperationHistory](#) aims the pointer at the nick between data, not the data, like [H H H]F F] (history, pointer, future)

Definition at line 8 of file OperationHistory.java.

Member Function Documentation

boolean data_center.OperationHistory.canCtrlY ()

Definition at line 24 of file OperationHistory.java.

boolean data_center.OperationHistory.canCtrlZ ()

Definition at line 19 of file OperationHistory.java.

void data_center.OperationHistory.clear ()

Definition at line 53 of file OperationHistory.java.

[SketchOperation](#) data_center.OperationHistory.ctrlY ()

Definition at line 41 of file OperationHistory.java.

[SketchOperation](#) data_center.OperationHistory.ctrlZ ()

Definition at line 29 of file OperationHistory.java.

void data_center.OperationHistory.display ()

Definition at line 59 of file OperationHistory.java.

void data_center.OperationHistory.newOperation ([SketchOperation](#) operation)

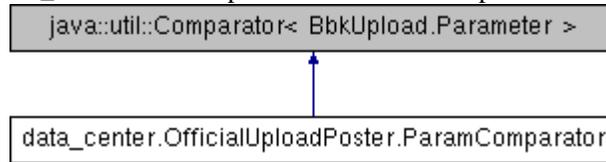

Definition at line 13 of file OperationHistory.java.

The documentation for this class was generated from the following file:

D:/_About å-å¹/ç^±å • %åå§†/SJTU-Software_2014/src/data_center/OperationHistory.java

data_center.OfficialUploadPoster.ParamComparator Class Reference

Inheritance diagram for data_center.OfficialUploadPoster.ParamComparator:

Public Member Functions

[ParamComparator](#) ()

[ParamComparator](#) (int order)

int [compare](#) (BbkUpload.Parameter o1, BbkUpload.Parameter o2)

Static Public Attributes

static final int [ASC](#) = 1

static final int [DESC](#) = -1

Detailed Description

The comparator to sort the parameters. When posting, the newly posted item's id is set to 999, the previously posted need to be posted in sorted order along with the newest one.

Definition at line 354 of file OfficialUploadPoster.java.

Constructor & Destructor Documentation

data_center.OfficialUploadPoster.ParamComparator.ParamComparator ()

Definition at line 362 of file OfficialUploadPoster.java.

data_center.OfficialUploadPoster.ParamComparator.ParamComparator (int order)

Definition at line 366 of file OfficialUploadPoster.java.

Member Function Documentation

int data_center.OfficialUploadPoster.ParamComparator.compare (BbkUpload.Parameter o1, BbkUpload.Parameter o2)

Definition at line 375 of file OfficialUploadPoster.java.

Member Data Documentation

final int data_center.OfficialUploadPoster.ParamComparator.ASC = 1 [static]

Definition at line 356 of file OfficialUploadPoster.java.

final int data_center.OfficialUploadPoster.ParamComparator.DESC = -1 [static]

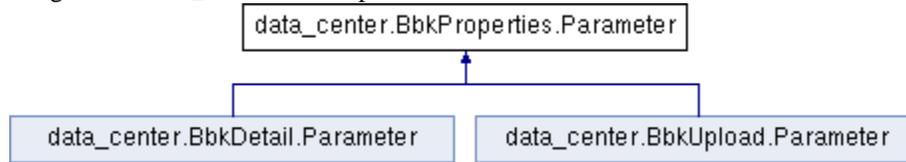

Definition at line 357 of file OfficialUploadPoster.java.

data_center.SearchCenter Class Reference

Public Member Functions

[SearchCenter](#) ()
boolean [canRollBack](#) ()
boolean [canGoForward](#) ()
SearchResultList [getCurrentRawSearchResultList](#) ()
SearchResultList [search](#) (String keyword)
SearchResultList [blast](#) (String input, int mode)
[BbkDetail](#) [getDetail](#) (String bbkName)
SearchResultList [rollBack](#) ()
SearchResultList [goForward](#) ()

Public Attributes

[SearchHistory](#) [historyList](#)

Detailed Description

Provide functions about searching database by SJTU-software. Can search by keyword, blast by sequence, get detail by name.

Definition at line 5 of file SearchCenter.java.

Constructor & Destructor Documentation

data_center.SearchCenter.SearchCenter ()

Definition at line 9 of file SearchCenter.java.

Member Function Documentation

SearchResultList data_center.SearchCenter.blast (String *input*, int *mode*)

Definition at line 38 of file SearchCenter.java.

boolean data_center.SearchCenter.canGoForward ()

Definition at line 20 of file SearchCenter.java.

boolean data_center.SearchCenter.canRollBack ()

Definition at line 15 of file SearchCenter.java.

SearchResultList data_center.SearchCenter.getCurrentRawSearchResultList ()

Definition at line 26 of file SearchCenter.java.

[BbkDetail](#) data_center.SearchCenter.getDetail (String *bbkName*)

Definition at line 45 of file SearchCenter.java.

SearchResultList data_center.SearchCenter.goForward ()

Definition at line 55 of file SearchCenter.java.

SearchResultList data_center.SearchCenter.rollback ()

Definition at line 50 of file SearchCenter.java.

SearchResultList data_center.SearchCenter.search (String keyword)

Definition at line 31 of file SearchCenter.java.

Member Data Documentation

[SearchHistory](#) data_center.SearchCenter.historyList

Definition at line 7 of file SearchCenter.java.

The documentation for this class was generated from the following file:

D:/_About å-ä¹/ç^±å • %å§†/SJTU-Software_2014/src/data_center/SearchCenter.java

data_center.SearchHistory Class Reference

Public Member Functions

void [putInItem](#) (SearchResultList item)
int [getCurrentItemNo](#) ()
SearchResultList [getCurrentItem](#) ()
boolean [canRollBack](#) ()
boolean [canGoForward](#) ()
SearchResultList [rollBack](#) ()
SearchResultList [goForward](#) ()
void [clear](#) ()

Detailed Description

The class implements a history list contains roll back and go forward function. Different from the [OperationHistory](#), the [SearchHistory](#) aims the pointer at the data, not the nick between data, like [H H H C F] (history, current, future)

Definition at line 8 of file SearchHistory.java.

Member Function Documentation

boolean data_center.SearchHistory.canGoForward ()

Definition at line 43 of file SearchHistory.java.

boolean data_center.SearchHistory.canRollBack ()

Definition at line 38 of file SearchHistory.java.

void data_center.SearchHistory.clear ()

Definition at line 78 of file SearchHistory.java.

SearchResultList data_center.SearchHistory.getCurrentItem ()

Definition at line 30 of file SearchHistory.java.

int data_center.SearchHistory.getCurrentItemNo ()

Definition at line 25 of file SearchHistory.java.

SearchResultList data_center.SearchHistory.goForward ()

Definition at line 63 of file SearchHistory.java.

void data_center.SearchHistory.putInItem (SearchResultList *item*)

Keeps the previous items and flush the following items.

Definition at line 14 of file SearchHistory.java.

SearchResultList data_center.SearchHistory.rollback ()

Definition at line 48 of file SearchHistory.java.

The documentation for this class was generated from the following file:

data_center.SketchCenter Class Reference

Public Member Functions

[SketchProject switchCurrentProjectTo](#) (String projectName)
[SketchProject newProject](#) ()
void [closeProject](#) (String projectName)
void [saveProject](#) (String filePath)
[SketchProject loadProject](#) (String filePath)
String[] [getAllProjectNames](#) ()
[BbkOutline assignBbkOutlineToBioBrick](#) (String bbkName, [BioBrick](#) biobrick)
[BbkUpload generateBbkUploadFromBackBone](#) ([BackBone](#) backbone, boolean findTwins)

Public Attributes

[SketchProject currentProject](#) = null
ArrayList< [SketchProject](#) > [projectList](#) = new ArrayList<[SketchProject](#)>()

Detailed Description

This class contains all of the operations of the sketch project. Further operation inside a project can be accessed by the reference of a [SketchProject](#) instance. Please note that the new, save, load all aim at the current project, which need no specification of the project name of its reference. To operate on another project? you may use the [switchCurrentProjectTo\(\)](#) function.

Definition at line 13 of file SketchCenter.java.

Member Function Documentation

[BbkOutline](#) [data_center.SketchCenter.assignBbkOutlineToBioBrick](#) (String *bbkName*, [BioBrick](#) *biobrick*)

Assign a [BbkOutline](#) to a [SketchComponent.BioBrick](#), specified by part_name. If the database doesn't have such name, a null will be returned.

Definition at line 80 of file SketchCenter.java.

void [data_center.SketchCenter.closeProject](#) (String *projectName*)

Close a project which can be either current project or not. Pass a null to represent current project.

Definition at line 40 of file SketchCenter.java.

[BbkUpload](#) data_center.SketchCenter.generateBbkUploadFromBackBone ([BackBone backbone](#), boolean *findTwins*)

Upload the newly designed biobrick to the database by SJTU-software! This function generates a [BbkUpload](#) instance to start this process. This function is aimed to simplify the upload process and as the interaction between the 4 functions of the software.

Definition at line 90 of file SketchCenter.java.

String [] data_center.SketchCenter.getAllProjectNames ()

Definition at line 70 of file SketchCenter.java.

[SketchProject](#) data_center.SketchCenter.loadProject (String *filePath*)

Load a project that will OVERWRITE CURRENT project

Definition at line 64 of file SketchCenter.java.

[SketchProject](#) data_center.SketchCenter.newProject ()

Definition at line 31 of file SketchCenter.java.

void data_center.SketchCenter.saveProject (String *filePath*)

Save the CURRENT project

Definition at line 56 of file SketchCenter.java.

[SketchProject](#) data_center.SketchCenter.switchCurrentProjectTo (String *projectName*)

Switch current project to a new one to execute new, save, load operation on it.

Definition at line 20 of file SketchCenter.java.

Member Data Documentation

[SketchProject](#) data_center.SketchCenter.currentProject = null

Definition at line 15 of file SketchCenter.java.

ArrayList<[SketchProject](#)> data_center.SketchCenter.projectList = new
ArrayList<[SketchProject](#)>()

Definition at line 16 of file SketchCenter.java.

void data_center.SketchProject.displayOperationHistory ()

Definition at line 196 of file SketchProject.java.

[BackBone](#) data_center.SketchProject.findBackBoneInBackBoneListByID (int *ID*)

Definition at line 61 of file SketchProject.java.

Component data_center.SketchProject.findComponentByID (int *ID*)

Definition at line 52 of file SketchProject.java.

void data_center.SketchProject.loadFromFile (String *filePath*)

Load the project graph from XML file, note that the project.name will be specified after the file name.

Definition at line 343 of file SketchProject.java.

void data_center.SketchProject.modifyComponent (int *theID*, int *attributeType*, Object *folAttribute*)

Registration function, receive the user operation and remember it in the backstage. The attributeType should be picked from Operation.TYPE_XXX. The folAttribute is the attribute changed into, such as Point, Color

Definition at line 101 of file SketchProject.java.

void data_center.SketchProject.onAbsorb (int *backBoneID*, int *bbkID*, int *index*)

Registration function, receive the user operation and remember it in the backstage.

Definition at line 130 of file SketchProject.java.

void data_center.SketchProject.onDesorb (int *backBoneID*, int *bbkID*)

Registration function, receive the user operation and remember it in the backstage.

Definition at line 141 of file SketchProject.java.

void data_center.SketchProject.saveIntoFile ()

Different from the overridden version in that this function is used to save into the file path already specified, like "Save", not "Save As".

Definition at line 298 of file SketchProject.java.

void data_center.SketchProject.saveIntoFile (String *filePath*)

Save the project graph into XML file, note that the project.name will be specified after the file name. This function is used as the "Save As" function, if path already specified (namely already saved once), you may call the [saveIntoFile\(\)](#), the function with no parameter to save again.

Definition at line 307 of file SketchProject.java.

data_center.TimeTagGenerator Class Reference

Static Public Member Functions

static String [generateYearMonthDateStr](#) ()

static String [generateHourMinStr](#) ()

static String [generateTimeTag](#) ()

Detailed Description

Used to generate time tag for [BlastingSearcher](#)(used to distinguish a blast request from another) and [BbkUpload](#)(used to record the enter date of the part into the database by SJTU-software)

Definition at line 8 of file TimeTagGenerator.java.

Member Function Documentation

static String data_center.TimeTagGenerator.generateHourMinStr () [static]

Returns:

Hour:Min

Definition at line 21 of file TimeTagGenerator.java.

static String data_center.TimeTagGenerator.generateTimeTag () [static]

Returns:

Time tag accurate to ms, no separators

Definition at line 30 of file TimeTagGenerator.java.

static String data_center.TimeTagGenerator.generateYearMonthDateStr () [static]

Returns:

Year/Month/Date

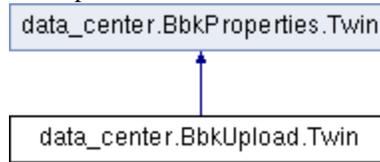

Definition at line 11 of file TimeTagGenerator.java.

The documentation for this class was generated from the following file:

data_center.UploadCenter Class Reference

Public Member Functions

[UploadCenter](#) ()

boolean [isBbkNameNotOccupied](#) (String rawName)

String [uploadAndGetOddNum](#) ([BbkUpload](#) bbkUpload)

[BbkUpload](#) [getBbkUploadByNameAndOddNum](#) (String name, String oddNum)

boolean [isSequanceValid](#) (String sequenceToken)

[BbkDetail](#) [getSubpartForSequenceToken](#) (String bbkName)

[BbkUpload](#).SpecifiedSubscar [getSubscarForSequenceToken](#) (String scarName)

Detailed Description

Provide function used when uploading a biobrick into database by SJTU-software. Also include validation check of the part_name, sequence the subparts and the subscars to be filled into [BbkUpload](#) instance to be uploaded.

Definition at line 6 of file UploadCenter.java.

Constructor & Destructor Documentation

data_center.UploadCenter.UploadCenter ()

Definition at line 8 of file UploadCenter.java.

Member Function Documentation

[BbkUpload](#) data_center.UploadCenter.getBbkUploadByNameAndOddNum (String name, String oddNum)

Use the part_name and the oddNum to find a previously uploaded biobrick. The oddNum is stored as the part_id of an bbk

Definition at line 27 of file UploadCenter.java.

[BbkDetail](#) data_center.UploadCenter.getSubpartForSequenceToken (String bbkName)

Used for subpart validation check.

Returns:

null if no such part_name is found, thus it can't be a subpart.

Definition at line 46 of file UploadCenter.java.

BbkUpload.SpecifiedSubscar data_center.UploadCenter.getSubscarForSequenceToken (String scarName)

Used for subscar validation check.

Returns:

null if no such scar name is found, thus it can't be a subscar.

Definition at line 53 of file UploadCenter.java.

boolean data_center.UploadCenter.isBbkNameNotOccupied (String rawName)

rawName is also known as the shortName

Returns:

true for the name is not occupied, so that it can be used as the part_name to be uploaded.

Definition at line 13 of file UploadCenter.java.

boolean data_center.UploadCenter.isSequanceValid (String sequenceToken)

Check if the sequence string is only consist if base group, not other chars.

Definition at line 33 of file UploadCenter.java.

String data_center.UploadCenter.uploadAndGetOddNum ([BbkUpload](#) bbkUpload)

Upload a new biobrick and get the odd number used to modify it later. The oddNum is stored in the part_id of an biobrick.

Definition at line 20 of file UploadCenter.java.

The documentation for this class was generated from the following file:

D:/_About å-ä¹¸^±å • %å§†/SJTU-Software_2014/src/data_center/UploadCenter.java
