Transfection: Booster Plasmid

Cells were transfected in a 12-well plate at 70%-90% confluency as shown below.

Wells were transfected with Lipofectamine according to the lipofectamin 3000 transfection protocol.

140519_12-well transfection plate				
	1	2	3	4
A	nluc C/D : PEI 1:2	nluc C/D : PEI 1:2	Booster : PEI 1:1	Booster : PEI 1:2
B	Booster : PEI 1:1	Booster : PEI 1:2	Booster : PEI 1:1	Booster : PEI 1:2
C	Booster : PEI 1:1	Booster : PEI 1:2	PBS : PEI 1:1	PBS : PEI 1:1

Observation:

- After transfection the cells were checked and many cells were gone!
