		Timeline													
	Objectives	2018				2019									
		September	October	November	December	January	February	March	April	May	June	July	August	September	October
Research	Initial contact with Claire Villemant														
	Bibliography and brainstorming														
	Initial contact with Eric Darrouzet														
	Identification of molecules of interest														
	Initial contact with Gilles Truan														
	Download and installation of Geneious software														
	Initial contact with Freddie Jeanne Richard														
	Simulation training on Labster														
	Establishment of metabolic pathways														
	Internship, Experiments														
	Initial contact with Romin Ferru Clément														
	Reception of bacterial strains														
	Genes design on Geneious software														
	Capture of primary nest of Asian hornet														
	Purchase of chemicals standard molecules														
	Field tests nearby beekeepers
