

# 04. (April) 2019

**Project:** iGEM\_Munich2019 Shared Project

**Authors:** Sarah Brajkovic

TUESDAY, 30/4/2019

**Transfection:** Fussenegger Plasmids

Cells were transfected in a 12-well plate at 70%-90% confluency as shown below.

Wells were transfected with Lipofectamine according to the lipofectamin 3000 transfection protocol.
