**Preparation for sequencing: E18**

**Anja**

**MidiPrep of E18** (see protocol)

- eluted in 300ul

Concentration:

-E18 = 405.2ng/ul (prepared 100ng/ul dilution)

**Moritz**

**Cell culture: HEK293T splitting and seeding**

One 96-well plate was seeded to try the cytotoxicity killing assay with Zeocin/PBS diluted DMEM (28.000 cells/well, 150ul).
