

Meeting with supervisors

Who: Everyone

Description:

Meeting with Clarissa, Uli, Helder, Anne, Kristin

How we share supervision

Uli will be away 2 weeks in August and several days in July

- Ask questions about bacteria and proteins

Kristine

- Molecular bio questions regarding lab;
- Next couple of the weeks will be in medical building (2 weeks)

Helder – going first supervisor

Clarissa

Send timeline to professors so that they can see where we will be time wisely.

Positive control for the isopeptide bond; - uli has a protein with an isopeptide bond but in a different domain so it can't be used as a positive control

Uli has Isopeptide domain in a PSF plasmid so that we can practice to transfect them, grow up and purify the protein;

10:00 am at the Hive meeting next week.

Add people to benchling;

Maybe buy more primers?

Try to buy standard NAB tag (protein marker).

Protein gels: Uli can bring the price down for precast gel

9-10 pounds to gel

Clarissa has hundreds of gels that they don't use- test if they work- if they do – we can use them; Clarissa will check if they are still in the cold room

General – beg for free stuff

Caution forms- Uli will put is on + card access (9 – 18:00)

Try get free nickel columns

Clarissa can search for similar old ones.

Make shifts; 4 people max on the bench at one time

Leave out hardware equipment in Purdie building in case we need it.

Take goggles from teaching labs.

Put primer sequencing on benchling.

Put backpacks at random area upstairs at a desk space.
