

Glycerol Stock

Materials

40% glycerol solution
Cryogenic Vials
Bacterial Culture

Procedure

1. Add 1 ml of 40% glycerol to a cryogenic vial.
2. Add 1 ml sample from the culture of bacteria to be stored.
3. Gently vortex the cryogenic vial to ensure the culture and glycerol is well-mixed.
4. Label the tube appropriately.
5. Store in a freezer box in a -80C freezer.
