

Bees and environment

We are currently working on an environmental project to save bees in Europe by trapping Asian hornets. In order to present our project, we would need to have an overview of youth awareness about the importance of bee survival and the danger the Asian hornet poses to the environment.

Thank you in advance for your answers.

***Obligatoire**

1. You are: *

Une seule réponse possible.

- Student
- University staf
- Teacher
- Autre : _____

2. In your opinion, is the gradual disappearance of bees in Europe serious? *

Une seule réponse possible.

- Yes
- No

3. Why? *

4. Do you think bees are important to the environment and biodiversity? *

Une seule réponse possible.

- Yes
- No

5. Why? *

6. Do you think that the Asian hornet and / or the European hornet play an important role in the disappearance of bees? *

Plusieurs réponses possibles.

- Yes for Asian Hornet
- No for Asian Hornet
- Yes for European Hornet
- No for European Hornet
- Yes for both of them
- No for both of them

7. Could you buy a hornet trap to protect bees? *

Une seule réponse possible.

- Yes
- No

8. If so, would you prefer a trap very specific to Asian hornet or a cheaper trap (25 €) but which can also trap other species of insects such as bees and bumblebees?

Une seule réponse possible.

- Specific trap
- Unspecific trap

9. What price would you be willing to pay for a specific hornet trap?

Une seule réponse possible.

- 30€
- Between 30 and 40 €
- Between 40 and 50 €
- More than
