OnePot PURE

7/31-8/3

**OnePot
training II
Ribosome
Purification**

Wednesday, 31 July 2019

Title: OnePot Ribosome purification

Aim: Produce and purify the ribosomes needed for OnePot PURE cell-free system

Participants: Konstantinos, Junyan + Josh

What was done: Produce and purify the ribosomes needed for OnePot PURE cell-free system Due to the nature of the facility we had to be supervised by Josh.

Saturday, 3 August 2019

Title: OnePot Protein purification + OnePot PURE functionality tests

Aim: Produce a new batch of protein solution and test the functionality of the system

Who was there: Konstantinos

Protocol: OnePot Protein purification, OnePot PURE protein expression, microplate reader

What was done: Protein purification and sf GFP expression on the plate reader

Results:
