

## Human Practices

Who: Amy and Eleonora

### Description:

Amy to message current students about possible members of staff who would be able to discuss with us the current treatments that use monoclonal antibodies

5th of June – Eleonora and Amy to get in touch with some of these members of staff and discuss the current options and get some sources about statistics on effectiveness etc. for the impact analysis report. Interview about current drugs being used and what a more stable drug would mean.

Eleonora to set up meeting with Clarissa to discuss the outreach project and the possibility of collaborating with another team involved in the project and running the activity in their local school

Eleonora to look into local charities who may want to meet with us to discuss current treatment options etc.

Amy to email charities focusing on accessibility to ask how we can make the wiki and our project in general more accessible

Eleonora to look into staff/PhD students at the university who could advise us on making the wiki more accessible

Eleonora to email the Dundee science centre about their science festival (held last year) or about hosting a general activity in collaboration with the centre [festivals@dundeesciencecentre.org.uk](mailto:festivals@dundeesciencecentre.org.uk)

Eleonora to email Anne about the Scottish meet up with provisional dates/times/details
