

Answers Question 5: How do you rate your prior knowledge of genetic engineering?

I work in this environment. especially with green genetic engineering.

TA of Biology

I had something in addition in the Bio GK. The topic had always been important to my teacher. But can't say that he was particularly enthusiastic about it.

Genetic engineering can be good, but unfortunately not humans. As long as other living beings are suffering, it is a bad thing.

Mainly in the agricultural sector.

Basic course in biology in the upper level

In a way, genetic engineering can make sense.

Monsanto is bad.

Genetically engineered corn
